Sergio Morales Galán

Software Developer · Flutter/Dart & Java/Spring Boot

PROFESSIONAL SUMMARY

Software developer with 4 years of experience building cross-platform mobile applications with **Flutter/Dart** and backends in **Java, Python, and C#**. Experienced in REST API integration, process automation through bots (WhatsApp Business), and end-to-end development from market research through implementation. Complementary training in Machine Learning and Deep Learning (Stanford Online / DeepLearning.ai). Computer Engineering student (UNIR).

PROFESSIONAL EXPERIENCE

Software Developer — *Digitel TS, Valladolid* 10/2022 - Present

- Built conversational bots on the **WhatsApp Business API** to automate customer support, integrated with in-house backend systems.
- Developed cross-platform mobile applications (iOS/Android) with **Flutter and Dart**, from UI design through store publication.
- Developed and maintained backend services in **Python, C#, and Java**, with REST API integration.

Software Developer — *Blue CE, Valladolid* 03/2022 - 06/2022

- Led market research and software development for a **wearable device** project for psychiatric patients, focused on medical data collection.
- Evaluated data-capture vendors and technologies, and prototyped the associated software solution.

Customer Service Representative — *Konecta, Valladolid* 07/2022 - 10/2022

- Provided customer support for Banco Santander, handling issues and inquiries in a high-volume environment.

Basketball Coach — *CD San Agustín, Valladolid* 08/2017 - 09/2020

- Designed and ran training sessions, and made tactical decisions during competition.
